

28<sup>th</sup> February 2008

Regarding: Peter Thornton-Smith

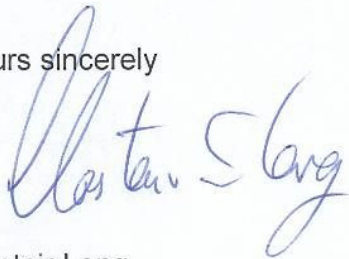

To whom it may concern

We requested Peter to work on a business critical project for three months in 2007 on our Quality Management System that had arisen following an audit by a major customer. He quickly assessed the situation and provided us with an in-depth response backed by a methodical schedule of work that helped us recover the situation at their next visit.

Throughout he was reliable in delivering a knowledgeable and professional solution to the point where we extended his contract for a further 6 months. He planned and implemented a full rewrite of our systems with a view to a hand over once we had a permanent member of staff who could take responsibility.

Based on our experience we would not hesitate to engage his services in the future and would recommend him to other clients.

Yours sincerely

Alastair Lang  
Managing Director

RS156
